

# Automatic Device for Single-phase Appliance, Multiple Payment Methods SLZA 43B

## Characteristics

- includes Bluetooth control  
(paid Sanela control app available for download)
- vandal-proof
- automatic device for single-phase appliances, multiple payment methods, 1 - 4 devices
- a single-phase appliance selection is made on the display of the payment terminal
- payment with coins, tokens, RFID tokens, contactless payment card, Google Pay or Apple Pay
- the device adds up the coins but does not return
- after payment the device switches on the selected contactor of the single-phase appliance (e.g. washing machine, hair dryer, TV) for the paid time
- automatic notification when the cash register is full as an option
- parameter setting and communication with the electronics via the Sanela Control app (Bluetooth)
- lockable
- for indoor use, temperature range +5 to +40 °C
- material stainless steel AISI 304 (1.4301)
- brushed finish

## Installation Drawing

- 1 - credit card reader  
2 - status indicator  
3 - RFID token credit value reader  
4 - coin box

## Technical Specification

|                                                    |                    |
|----------------------------------------------------|--------------------|
| Dimensions                                         | 320 x 240 x 160 mm |
| Weight                                             | 7,85 kg            |
| Thickness of material                              |                    |
| ▪ the front cover                                  | 3 mm               |
| ▪ box                                              | 1,5 mm             |
| Operating voltage                                  | 24 V DC            |
| Power input in sleep mode                          | 8 W                |
