

Thermostatic valve with safety lock, 1" SLT 08A

Characteristics

- flow rate 53 l/min at pressure 0.1 MPa
- water temperature adjustable in the range of 20 - 65 °C
- for proper operation, it is necessary that the pressures in both supply lines are the same
- check valves must be installed before the mixing valve
- the constant water temperature is set by turning the control knob
- it continuously regulates the amount of hot and cold water and every change in temperature is corrected almost immediately by the thermostatic element
- shut-off of hot water in the event of cold water failure within 1 second

Technical Specification

Flow rate	flow rate 53 l/min
Dimensions	125 x 235 x 100 mm
Weight	2,5 kg

Supply Specification

SLT 08A - Supply No. 09081 thermostatic mixing valve with safety lock, 1", built-in thermometer, anti-scald safety system
