WALL-MOUNTED CABINETS FOR MODULES FOR MIRRORS

Wall-mounted cabinets designed for the installation of one or two SLZN 84 modules are intended for installation above washbasins or washing troughs, especially in public sanitary facilities.

The front surface of the door is fitted with a glued mirror in stainless steel or glass design. In the lower part of the cabinet, pictograms are placed that clearly identify the type of installed module.

The top variant SLKA 10AS is equipped with backlit pictograms with dimmed white light for easy user orientation.

The cabinets are supplied with already installed modules according to customer specification.

SLKA 10AS 40100

- cabinet above the washbasin made of laminated chipboard panels
- panel thickness 18 mm
- glass mirror
- with white backlighting of pictograms
